

Greg Labbé is co-owner of [BlueGreen Consulting Group](#), a high performance home consulting firm that does design optimisation and construction site testing. They work with architects, builders and homeowners to optimise the energy performance of new or existing homes through detailed energy modeling and site testing. Their firm also does research on existing housing stock with students from Humber College and Ryerson University. Greg contributes regularly to Sustainable Builder and Home Energy Magazine and teaches a lab part-time at Humber College. He is also one of OHBA's Institute of Building Excellence trainers as well as a trainer for CaGBC and the Sustainable Building Advisor Institute's SBA certification.
