

Ryan Dalglish has been involved in the building envelope and building performance areas of construction in both the commercial and residential sectors for close to 2 decades. Much of Ryan's time is spent on technology transfer, organizational excellence and education. Ryan has been a trainer, facilitator and performed a number of management roles for close to 2 decades. Ryan also is involved in research, development of training curriculum, and helping industries increase their professionalism. Ryan obtained credentials in Adult Education, Leadership and Organizational Excellence from the University of Manitoba.

Ryan has also published a number of papers for design and construction magazines such as Journal of Building Enclosure and Design, Construct Canada and Interface. Ryan frequently speaks at various technical presentations dealing with the building envelope to various building official associations, city departments and building enclosure councils across Canada and the United States, American Institute of Architects, Construction Specifications Institute and a number of local home builder associations.

Ryan has also published a number of papers for design and construction magazines and is frequently a speaker at various technical presentations dealing with the building envelope.
